<i>Possible points:</i>	0 - 2
Put your name, the course, the due date and all the sections in the <b>upper right corner of the first page</b> .	
In the upper right corner of <b>each page</b> , write the section number of the exercises that appear on that page.	
<b>State the problem</b> as well as the solution. You may abbreviate phrases instead of writing complete sentences, but provide an indication of what you are attempting to solve.	
<b>Show all your work</b> . Show details of algebraic operations and all significant steps. Do not omit important steps and don't copy solutions from the answer book or other students.	
Draw all graphs <b>on graph paper</b> . Make sketches of the problem when appropriate.	
<b>Be neat</b> . For a college-level mathematics assignment, do not submit work that is messy, that contains sloppy graphs, disorganized presentations, illegible handwriting or items crossed out. Do scratch work separately and submit a neat final copy.	
<b>Use pencil</b> , not pen for all homework assignments..	
Do problems <b>in order</b> and compile sections in order prior to submitting	
Before submitting homework, <b>staple</b> all pages together in order in the upper left corner. Do not use paper clips, binders, folders or other devices.
